They find it easy to read, interesting and engaging. . . . This textbook's major strengths are its cognitive perspective, its readability, and the fact that it puts into practice some of the information-processing strategies that it teaches as effective ways to process information. . . ." --Elizabeth Pemberton, University of Delaware "[T]he text is written in a . . . conversational style that invites students to actively explore complex questions about teaching and learning. It is well-organized, supported with visual aids, and various learning tools, such as guidelines, reflection activities, and cases presenting opposing viewpoints. Most importantly, the text is informed and well supported by contemporary scholarship in the field of educational psychology." --Alina Reznitskaya, Montclair State University
